

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

EXPLANATION

This catalog is for the children and for their parents and teachers to use with them and for them. Its arrangement is shown in the table of contents.

All books in it are to be found in the children's room of the main library; although some of them were written for grown people, they have proved equally interesting and useful to boys and girls.

General literature, authors, comprises all books not fiction. Much of the fiction on the shelves was handed over to the children's department when it was opened. In compiling this catalog, the outgrown and fairly good have been passed over and only the best books have been chosen.

The List of Subjects has been prepared to answer the question, "What are these books about?" as well as to furnish help in preparing lessons or looking up matters of special interest. Subject headings are printed in blacker type than the books under them; when reference is given to a chapter or other part of a volume, the word *in* is used before the title. Stories throwing light on the topic, or pleasant to read in connection with it, are added to many of the subjects.

It is impossible to include in a printed Catalog all the resources of the children's library, because of continual purchases; therefore, the card catalog must be consulted for fuller information and for the names of the newest books. Supplementary lists of Selected and Classified Stories are offered as suggestions in the choice of reading for various ages and tastes.

This Catalog is designed to meet needs made known in a dozen years' experience and to prepare the children to use catalogs and indexes in the reference room and the main library. When its mistakes and imperfections meet the eye, perhaps they will be viewed with some degree of indulgence if it be remembered that all the work upon it, to reading the last page of proof, has been carried on in connection with the care of the department, amidst the daily routine of its administration and the coming and going of the children, for whose sake it has been a labor of love.

The Hoyt Henshaw Stevens Memorial Library for Sick Children is in the care of the children's department. It fills six cases of a size convenient to handle; these are sent separately upon application to any sick or crippled child not suffering from a contagious disease.
